

Dept Number	CS 538		Course Title	Game Theory in Networks						
Semester Hours	3		Course Coordinator	Henry Hexmoor						
Catalog Description	<p>Game theoretic concepts apply whenever actions of several players are interdependent. This course will provide an introduction to classic game theory and strategic thinking including dominance, Nash equilibrium, and stability. Social choice, social learning, and online mechanism design are then discussed. We will examine how game theoretic concepts can be used in developing reasoning strategies, i.e., algorithms. Application of game theoretic framework to telecommunication and human networks is an integral part of this course.</p>									
Textbooks										
<ol style="list-style-type: none"> 1. Nisan, N., et. al. <i>Algorithmic Game Theory</i>, Cambridge University Press, 2007. 2. Menache, I. and A. Ozdaglar. <i>Network Games Theory, Models, and Dynamics</i>. Morgan and Claypool Publishers, 2011. 3. Jackson, M. <i>Social and Economic Networks</i>. Princeton University Press, 2008.

Course Learning Outcomes										
<ul style="list-style-type: none"> • An understanding of game theory as strategic reasoning. • Development of problem analysis skills to incorporate game theory. • The skills to design a game as a novel treatment for existing computer science problems. 										
Assessment of the Contribution to Student Outcomes										
Outcome →	1	2	3	4	5	6	7	8	9	10
Assessed →	X	X	X	X		X	X			
Prerequisites by Topic										
Graduate standing or consent of instructor.										

CS 538	Game Theory in Networks	Page 2
Major Topics Covered in the Course		
Course Outline:	Lectures	
Fundamentals of Game theory	<u>28</u>	
Decision Theory, Utilities	4	
Normal and Extensive Forms	4	
Evolutionary Game Theory	2	
Bayesian and Stochastic Games	2	
Coordination: Coordination Games and Common Knowledge	2	
Coalitions and Cooperative Games	4	
Learning: Social/Economic models	4	
Communication Networks	2	
Mechanism Design: Social Choice and MD	2	
Online Mechanisms	2	
Engineering Applications	<u>12</u>	
Graphical Games	2	
Cryptography and Security	2	
Wireless Networks	2	
Optical and P2P Networks	2	
Social Networks	2	
Network Security	2	
Total	40 hours
