CS GRADEBOOK

Agenda

- Overview
- Terminology
- Functionality
- Demonstration

Overview

- Who is this application for?
- What does the application do?
- Key points
 - Instructors and students are both unhappy with the current method for submitting files.
 - Instructors and students are also unhappy with the current web based gradebook.

Overview

- Pages and functionality are mainly written using PHP and HTML.
- A few JavaScript pieces.
- Users will run on any platform using their preferred web browser.

Terminology

- ⦿ TA side: any page or functionality that a member of the course staff will be able to use.
- ⦿ Student side: anything that a student user will be able to use.

Functionality

⦿ TA Side

- Create a new assignment
- Enter grades for an assignment

⦿ Student Side

- Submit files to an assignment
- View grades for one of their courses
