

Course Number	CS 415	Course Title	Network Forensics				
Semester Hours	3	Course Coordinator	Henry Hexmoor				
Catalog Description	With the proliferation of wireless networks, security is at odds with privacy and integrity. The course provides a broad overview of security strategies for wireless networks. Topics will range from intrusion detection and network security protocols to collaborative computing. Contemporary tools and techniques for wireless network security are reviewed. A hands-on project will be an integral part of this course.
